Java, Python, JavaScript, React, HTML, CSS, Spring, Agile, SQL, Docker, Git/Github, Bootstrap, Microsoft, ServiceNow

EXPERIENCE

City Carrier Assistant

United States Postal Service, Worcester MA

June 2025 - December 2025

Restaurant Manager

Ming House, Worcester MA

February 2023 - Present

- Monitor daily operations with a goal of keeping everything orderly.
- Keep content updated: online website, online ordering platform, menu, hours and more.
- Resolve conflicts if and when they occur, both customer and employees.

Software Developer Intern/Co-op

Shaw Industries, Remote

May 2022 - August 2022

- Contributed to Shaw Industries Service Portal projects, including the building of catalog items, automating of backend workflow, and other frontend features.
- Developed catalog items used by hundreds of users, making it easier for employees to request access to services, products or permissions using ServiceNow, JavaScript, HTML, and CSS.
- Automated workflow for many procedures on the portal, minimizing time and increasing organization.
- Gathered requirements from business owners and stakeholders, created epics and stories, and conducted testing by documenting complete test scripts for users through the agile methodology.

Project

Ming House Restaurant Website, Ming House, August 2024 - Present

[GitHub](#) [Link](#)

Intended for customers to be able to check out general info on the restaurant including prices, location and hours.

- Implemented REST API using Java Spring used by frontend to get or send necessary information.
- Connected the MySQL database to store all data of menu items, users, current cart, and placed order.
- Designed an intuitive user interface using HTML, CSS, JavaScript, Bootstrap, and React
- Dockerize API and database for simplified deployment, testing, and running.
- React, HTML, CSS, JavaScript, Bootstrap, Java, Spring, SQL, Docker

7Factor Staffing Tool, WPI, August 2022 - March 2023

Worked with 7Factor to implement a staffing tool to track billable hours, company revenue, and project resources.

- Created user stories by conducting interviews with the founder and employees.
- Implemented responsive design for all platforms including phone, tablet, and other nonstandard displays, keeping all functionalities and features using MaterialUI and Bootstrap.
- Java, Spring, PostgreSQL, JavaScript

Hospital Servicing Application, WPI, January 2022 - March 2022

[GitHub](#)

Hospital Equipment Tracking and Servicing application for Brigham and Women's Hospital

- Integrated backend service with SQL and MongoDB to add, delete, update, and query information for service request components of the application.
- Designed and implemented backend API's and integrated frontend with the APIs.
- Java, JavaFX, SQL, MongoDB
